

Cisco Packet Tracer

Setup Instructions for Windows

1701 Computer Networks Lab

Lecturer: Pantelis I. Kaplanoglou

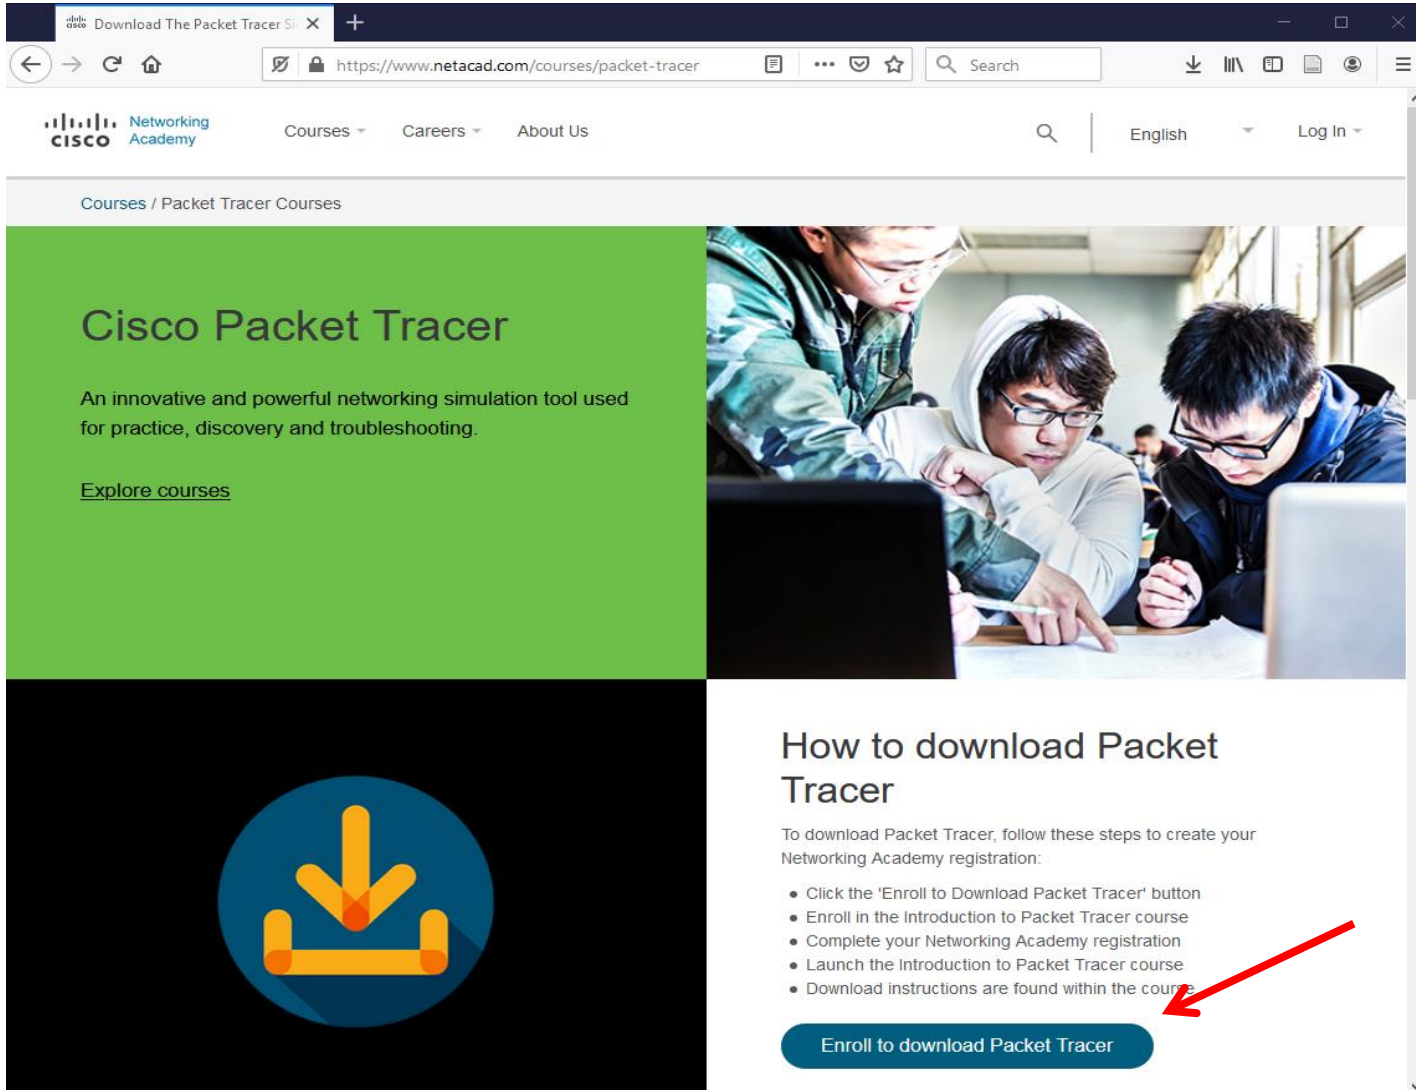

Department of Information and Electronic Engineering

International Hellenic University

Step 1: Enroll and download

<https://www.netacad.com/courses/packet-tracer>

The screenshot shows the Cisco Networking Academy website for the Packet Tracer course. The page has a green header with the Cisco logo and navigation links. The main content area is divided into two columns. The left column has a green background with the text 'Cisco Packet Tracer' and a description: 'An innovative and powerful networking simulation tool used for practice, discovery and troubleshooting.' Below this is a link 'Explore courses'. The right column has a white background with a photo of three students working on laptops. Below the photo is the section 'How to download Packet Tracer' with a list of steps: 'Click the 'Enroll to Download Packet Tracer' button', 'Enroll in the Introduction to Packet Tracer course', 'Complete your Networking Academy registration', 'Launch the Introduction to Packet Tracer course', and 'Download instructions are found within the course'. A red arrow points to the 'Enroll to download Packet Tracer' button at the bottom of the right column.

Step 2: Begin the installation

- Click **Next** until it becomes **Install**

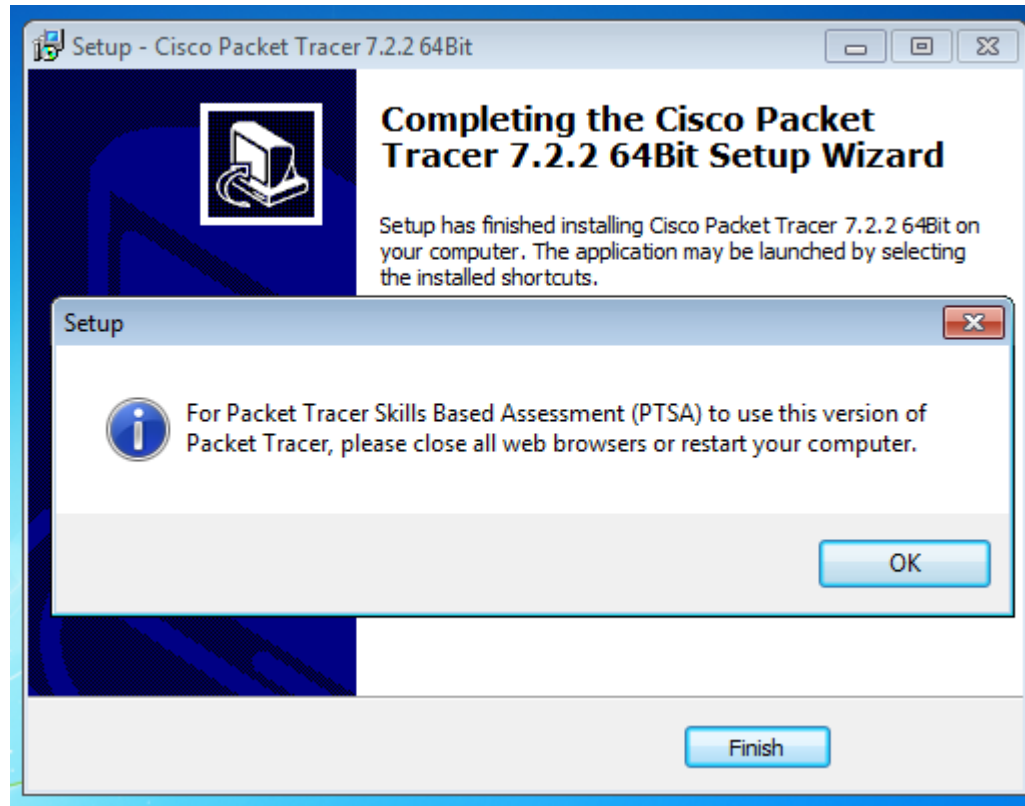

Step 3: Start copying files

- Click **Install** to start the installation process.

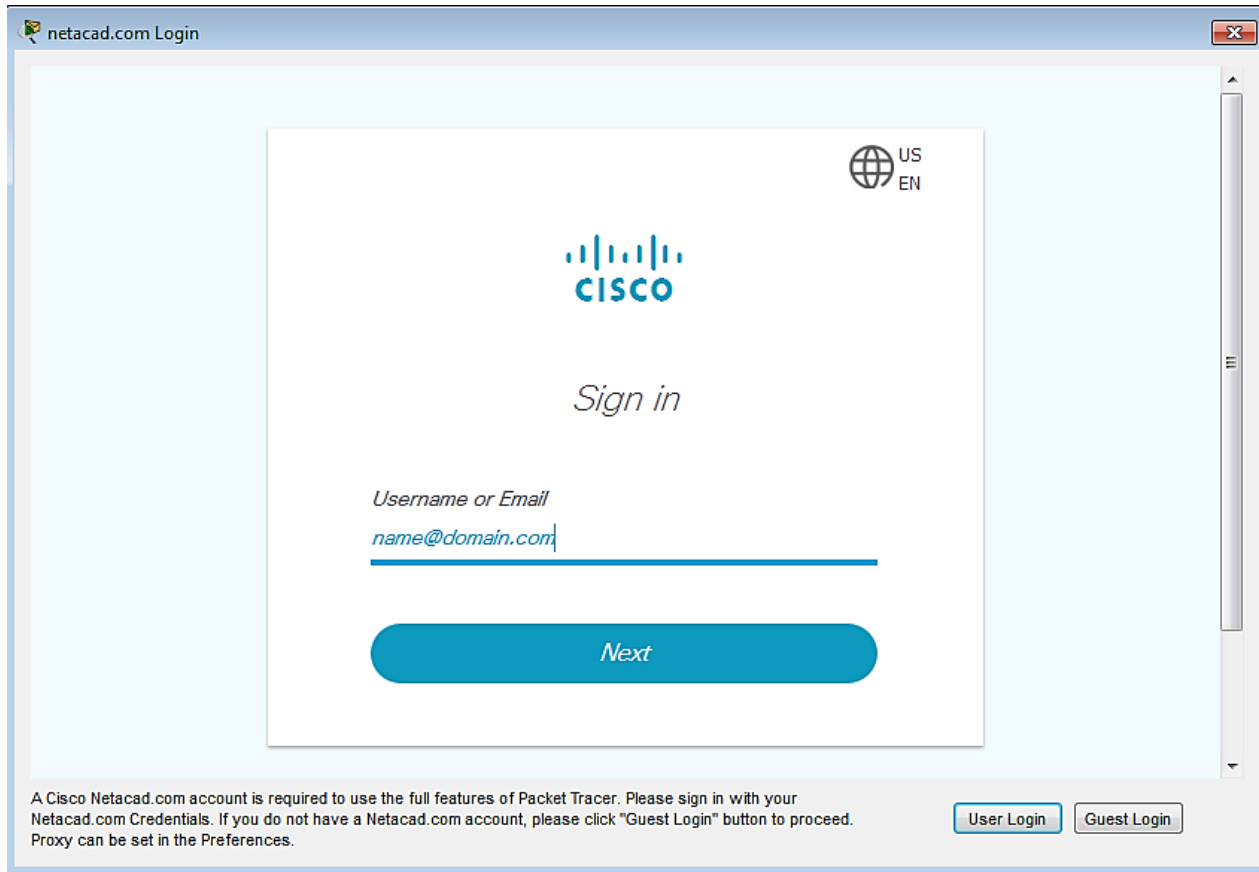

Step 4: Finalize the installation

- Click **OK** and then **Finish**.
- Launch the application.

Step 5: Login/Identification

- Enter the username that you have registered with and press **Next**.

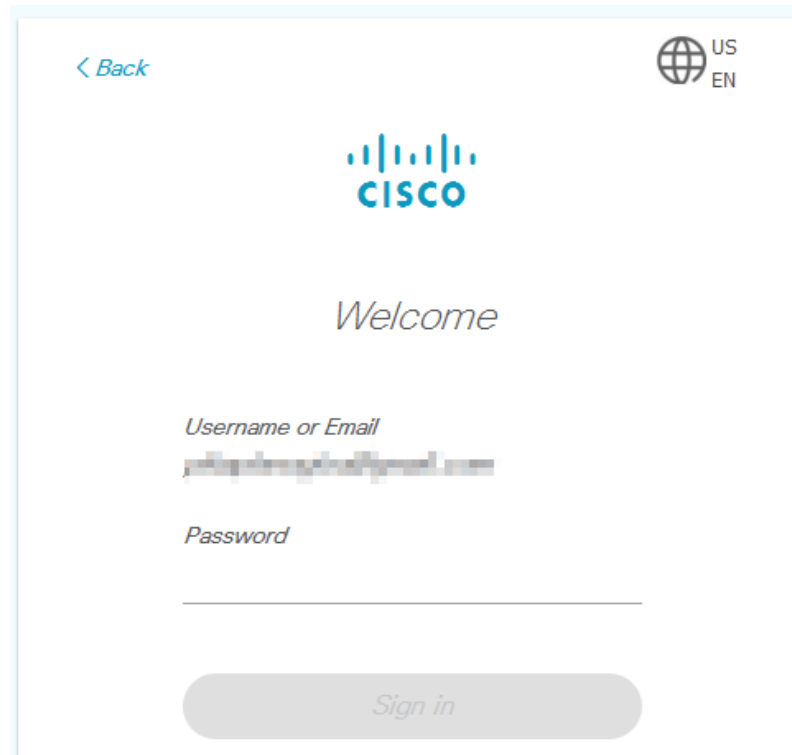

The screenshot shows a web browser window titled "netacad.com Login". The main content area has a light blue background. In the center, there is a white box containing the Cisco logo (a stylized bridge) and the word "CISCO" in blue. Below the logo, the text "Sign in" is displayed in a grey, italicized font. Underneath, the label "Username or Email" is followed by a text input field containing the placeholder text "name@domain.com". A blue underline is visible under the input field. Below the input field is a large, rounded blue button with the word "Next" in white. In the top right corner of the white box, there is a globe icon with "US" and "EN" next to it. At the bottom of the browser window, there is a grey footer area. On the left, it contains the text: "A Cisco Netacad.com account is required to use the full features of Packet Tracer. Please sign in with your Netacad.com Credentials. If you do not have a Netacad.com account, please click 'Guest Login' button to proceed. Proxy can be set in the Preferences." On the right, there are two buttons: "User Login" (highlighted with a blue border) and "Guest Login" (a standard grey button).

See you at the lesson!

Step 5: Login/Authentication

- Enter the corresponding password to enable and then press **Sign In**.
- You will then see the application's workspace.

The image shows a login interface for a Cisco application. At the top left is a blue link labeled "< Back". At the top right is a globe icon with "US" and "EN" text next to it. In the center is the Cisco logo, consisting of a stylized signal icon above the word "CISCO". Below the logo is the word "Welcome" in a serif font. Underneath is a label "Username or Email" followed by a text input field containing a blurred email address. Below that is a label "Password" followed by a password input field. At the bottom is a large, rounded, light gray button with the text "Sign in" in a serif font.
